- Opens the door to the prejuvenation™ patient
- Gentle treatments for vibrant refreshed looking skin
- Quick comfortable treatments with little to no downtime

MOXI™
Level 2: 7.5 mJ, 15% Density

ALL NEW FROM SCITON!

“...
I wasn't sure where MOXI was going to fit in my practice. Turns out, it brings a whole new patient - a patient who is younger. I am loving MOXI. So far it is excellent, and patients love it.

Jason Pozner, MD

MOXI delivers fractionalized non-ablative laser energy to gently remodel skin, targeting grades of sun damage in the epidermis, dermis, and below.

BBL® uses pulse duration and energy to gently heat skin, targeting only the epidermis of the face, neck, hands, and body, resulting in rejuvenation without pain.

BBL uses photothermal energy to gently heat skin, targeting cells to improve the appearance of the face, neck, hands, and body — resulting in younger looking skin everywhere.
